WEDNESDAY, JANUARY 30 1884.

Every United States Senator is to have a clerk, whose salary is to be paid out of the cartingent fined. There certainly is no style shous the members of the Rouse of they have been call for a slice of the same pie, and get it.

Facat a leasures point of view, the Senate have kicked a considerable chunk of fat in the fire what they work to turn the valuable and applied increasing commerce of Mexico over to fingland and Genmary. Texas will lose many dollars by the narrow-minded policy.

Speaking of the provision in the Constitution prohibiting any supropriation for the New Orleans fair, the Jefferson Jimplecute says: "Sath a constitution should be suped not at once, for so long as it crands it will be a blot on civilization."

The Legislaters should now haven to pass a resolution denouscing John Harcock and of orang Governor freign. Another speci-ciant of serving cannot damage the Legisla-ter, and it has alread useff too much to floor independence and self-respect at this

The records of the District court of Bessel county continue to humbs angle peoof of the trails of the old oldge of "marrying in hash and repeating a feature." There is no likiling all in the number of married people who deduce to be released from their marriage counts that they may try a scenic bast of their net into the near of matrimumy.

The groking meaner in which the New York sun has pressed Mr. Holman, for the Freedenity, has given currency to the report that Str. Charles A. Deza has been stacked with softening of the bron. The disease shawest itself when he went over to the Domocracy, and has recastly increased ever tone.

As one register, for Times, asserts very outliesly, that the Galesston News is not a learn crait newspaper, it is in order, for the times to define, by meres and hounds, what mentione a Democratic paper, so that it can estematized upon the greanti. What constitutes a Dimocratic newspaper is senartly used just now.

This Rev. Joseph Conk doclares that there is only five newspapers in the United States hat a sail-respecting American would recombend a friend to read. This is either a white-land sclander of long supportions, or a case of impracrable stepality. The newspapers will compare most fewerably with the preachers as a officencies and moralists, and a preacher date of the contract and moralists, and a preacher date. compare most favorably with the prescuers as officialize unil moralizes, and a prescher dues thinself so credit by escenting and whitiying newspapers in the gross. Mr. Joseph Cook is, doubtless, a Pharisee of the first grade.

Ties, old adage that "a burnt child dreads the firs," does not seem to hold good with the Howton Post and Galveston News, in the Howton Post and Galveston News, in the matter of interviews, and the Hancock business is very much the same as the Reagan, Galveston, and other interviews published leaf summers, wherein these papers made stakements that were as positively denied by such. The victim and the correspondent should e dh preface his remarks, with 'I' do solemily swear," size, and then the public would in a sight degree place some reliance in the published statements.

The people of Chicago have been greatly bothered and people of at the singular fact that all the beef cattle break out into a dole-fail bellowing, the very instant that they reach the concrete limits, and all sorns of sapinations have been vouchasted by the Chicago press, the bulk of them being incomprehensible from the uniquing of slang and scientific terms. Emory Stores is consulting the law

ful believing of the beef eattle is the enormous size of the shoes worn by Chicago women, ranco laving it that only to women in the city being shile to squeeze their feet into number sweet.

into number seven.

The Neshville American thinks the free traders can not count on the South, and says: 'The ambitious free trade Democrates who, it is said, are arranging a programme for a new sectional free trade party to embrace the States of the West and South, will find themselves raining counter to the following imperiant Southern districts: Rese in South Carolina, coal and iron in Alabama, Georgia, Tennessee, North Carolina and Virginia, sugar in Louisans, sugar and wood in Texas, and conton and weeker milk to several States, and conton and weeker milk to several States, to say muthing of nonconsus other manufacturing enterprises. It will not be take to count you supposed antagionism to their neighbors, for the farmers, who are their neighbors, for the farmers, who are their neighbors, for the farmers, who are bridding or either vertex throught their supposed antagonism to other produces."

The contradicts structure, as it appears from

The political situation, as it appears from the extreme protectionist standpoint, is thus presented by the Washington corresponding of the Philadelphia Tunes: A mustless of prominent Democrats have come to Washington within the last few days. Regarding the elicit on the party's prospects resulting from the domination of the free traders to the Bosse of Recognition. Bemocacy electing the President, before so hopeful, was addenly observed by Carlisle's election and subsequent action in connection with the avoidale of the leaders in the hour of their triumph. "I have come on here," said a New York Democrat, "to learn for myself what truth there is in the representations that our party has fallen into the hands of those whose ultimate object is free trade, and who, if they become reconciled to the government, are animated by the purpose of controlling it for objects sectional and personal. I find, to say the least, that too, much of this is true, especially as relates to free trade." Said another from Pennsylvania: "I find down right healiffy existing theard our great interests, with Mr. Randall virtually proceedings at an insupond Democrat, and that the word is out that, hereafter, we must follow the leaders who so hately led in the field against the Union or leave the party."

That ex-Governor Roberts made a good

as he did and better. The Bourbon party being the dominant one it is not supposed for a
moment that the supposition or Republicans
can or will have a land in shaping such an
event, but to the Linier it does not slock particularly creditable on the part of the Domoncary that when they get into trouble they
have no faith in but one man and one who
has in a measure lived our the time of his activity. This attempt at this day to again
bring the "old alcalid" to the front ought to
suggest much foud for thought to the track
and tile and younger members of the Bourboot
party and given a binat that activity, Dusins,
gargers and husiness is very much below
part, when it comes to choosing leaders to represent them in the affairs of State, and the
men who originated the present movement
could not more plainly tell the great mass of
volves that they are looked upon simply as
cattle.

witers that they are looked upon simply as cattle.

"One of the most disactions customs of Texas," says the McGregor Plaindesler, "is its credit system. Everything is bad shout it, and the innocetani law of the State is the prime cause. The wholesale merchants send out drainments to drain the result merchants for most properties to drain the result merchants to purchase and then the Sheriff drains them for the pay. It would seem that experience would teach our retail merchant to be more caseful, but every day we see that some one of them has failed. But the wholesale merchant does not fail, yet they both all on time. The retailer has no protection, while the wholesale merchant less ample. Even if our miscreham shoes not fail all his profits are on his books, where is the certiff. We answer, it lies in the credit system. If all transactions were made our a cash basis, it would seem for away with cotton raising and new and more remunerative induseries would soon be taken hold of. Farmers would issue he papear for coming needs, they would depend on their own effort un now they so the debt all that a hig crop of cotton would pay out, but the cotton is a poor trop compared with their calculations and they can't pay the retailer and the wholesale dealer sends on and closes our country merchant out, a new one opens up and he likewise learns who can be trusted after it is too late. There is no class that would reneive greater benefit from a strictly cash business than the farmer, for he would live within his income and save the sourmons price he now pays for result.
